FAQs

Q: When should I test air quality?

If you notice symptoms like allergies, respiratory issues, unusual odors or the other symptoms mentioned above.

Q: How many areas should I test?

Test all affected spaces: living rooms, bedrooms, offices, kitchens. For rooms with obstructions or partitions, test individually.

Q. When should I choose the Surface Swab test and how many areas should I test ?

A sterile swab is used to wipe the surface. Test surfaces which show signs of contamination or Mold.
